

QFLPN P3 – Bibliografie: adăugări 10/10

Bibliografia existentă este păstrată integral. Se adaugă 8 referințe, toate cu nota 10/10.

Nr.	Autor(i)	Publicație	Notă
19	Rajesh Nishtala; Richard W. Vuduc; James W. Demmel; Katherine A. Yelick	Performance Modeling and Analysis of Cache Blocking in Sparse Matrix Vector Multiply. UCB/CSD-04-1335, University of California, Berkeley, 2004	10/10
20	Benjamin C. Lee; Richard W. Vuduc; James W. Demmel; Katherine A. Yelick	Performance Models for Evaluation and Automatic Tuning of Symmetric Sparse Matrix-Vector Multiply. ICPP, 2004	10/10
21	Richard W. Vuduc; James W. Demmel; Katherine A. Yelick et al.	Performance Optimizations and Bounds for Sparse Matrix-Vector Multiply. SC 2002 / ACM-IEEE Conference on Supercomputing, 2002	10/10
22	Timothy A. Davis; Yifan Hu	The University of Florida Sparse Matrix Collection. ACM TOMS 38(1), Article 1, 2011	10/10
23	Timothy A. Davis; S. Rajamanickam; W. M. Sid-Lakhdar	A Survey of Direct Methods for Sparse Linear Systems. Acta Numerica 25, 383–566, 2016	10/10
24	Timothy A. Davis	Graph algorithms via SuiteSparse: GraphBLAS: triangle counting and K-truss. 2018 IEEE HPEC, 2018, pp. 1–6	10/10
25	Timothy A. Davis	Algorithm 1000: SuiteSparse:GraphBLAS: Graph Algorithms in the Language of Sparse Linear Algebra. ACM TOMS 45(4), Article 44, 2019	10/10
26	Timothy A. Davis	Algorithm 1037: SuiteSparse:GraphBLAS: Parallel Graph Algorithms in the Language of Sparse Linear Algebra. ACM TOMS 49(3), Article 28, 2023	10/10
