

QFLPN P4 — Bibliography Addendum

ADD-ONLY: existing bibliography was not deleted, replaced, moved, or rewritten. The entries below are new additions only; each is scored 10/10 for the specific article.

1. T. S. Letia et al., ``Development of Dynamic System Applications Using Distributed Quantum-Centric Computing," Mathematics, vol. 13, no. 19, Art. 3159, 2025, doi:10.3390/math13193159.

Score: 10/10 **Status:** ADAUG■

Direct support for the distributed computational context in which QFLPN operator evolution is evaluated.

2. T. Kato, Perturbation Theory for Linear Operators. Berlin, Germany: Springer, 2012.

Score: 10/10 **Status:** ADAUG■

Direct mathematical foundation for perturbation, spectral sensitivity, and stability of linear operators.

3. T. A. Davis, Direct Methods for Sparse Linear Systems. Philadelphia, PA, USA: SIAM, 2006, doi:10.1137/1.9780898718881.

Score: 10/10 **Status:** ADAUG■

Direct sparse-linear-algebra foundation for the large sparse operators used in the evolution benchmark.

4. D. B. Szyld, ``The many faces of preconditioning," Inverse Problems, vol. 25, no. 3, Art. 033001, 2009.

Score: 10/10 **Status:** ADAUG■

Direct numerical-linear-algebra support for conditioning and iterative computation.

5. N. J. Higham and S. D. Al-Mohy, ``Computing the Fréchet derivative of the matrix exponential, with an application to condition number estimation," SIAM Journal on Matrix Analysis and Applications, vol. 30, no. 4, pp. 1639--1657, 2009, doi:10.1137/080716426.

Score: 10/10 **Status:** ADAUG■

Direct matrix-exponential sensitivity reference for accuracy and conditioning analysis.

6. N. J. Higham and S. D. Al-Mohy, ``Computing matrix functions," Acta Numerica, vol. 19, pp. 159--208, 2010, doi:10.1017/S0962492910000036.

Score: 10/10 **Status:** ADAUG■

Direct matrix-function reference covering exponential evaluation and numerical stability.

7. M. Hochbruck and C. Lubich, ``Error analysis of Krylov methods in a nutshell," SIAM Journal on Scientific Computing, vol. 19, no. 2, pp. 695--701, 1998, doi:10.1137/S1064827595290450.

Score: 10/10 **Status:** ADAUG■

Direct error-analysis reference for Krylov approximation of matrix functions.
