

QFLPN P4 – Bibliografie: adăugări 10/10

Bibliografia existentă este păstrată integral. Se adaugă 7 referințe, toate cu nota 10/10.

Nr.	Autor(i)	Publicație	Notă
17	Roger B. Sidje; William J. Stewart	A numerical study of large sparse matrix exponentials arising in Markov chains. Computational Statistics Data Analysis 10/10 29(3), 345–368, 1999	
18	Huy D. Vo; Roger B. Sidje	Approximating the large sparse matrix exponential using incomplete orthogonalization and Krylov subspaces of variable dimension. Numerical Linear Algebra with Applications 24, e2090, 2017	10/10
19	Khanh N. Dinh; Roger B. Sidje	Analysis of inexact Krylov subspace methods for approximating the matrix exponential. Mathematics and Computers in Simulation 138, 1–13, 2017	10/10
20	M. A. Botchev	A block Krylov subspace time-exact solution method for linear ordinary differential equation systems. Numerical Linear Algebra with Applications 20(4), 557–574, 2013	10/10
21	M. A. Botchev	Krylov subspace exponential time domain solution of Maxwell's equations in photonic crystal modeling. Journal of Computational and Applied Mathematics 293, 20–34, 2016	10/10
22	Cleve Moler; Charles Van Loan	Nineteen Dubious Ways to Compute the Exponential of a Matrix. SIAM Review 20(4), 801–836, 1978	10/10
23	Charles F. Van Loan	The Sensitivity of the Matrix Exponential. SIAM Journal on Numerical Analysis 14(6), 971–981, 1977	10/10
